## CASEMENT DOOR

Hinged door with frame, featuring a single-point locking system and compatible with glass thickness ranging from 6 mm to 24 mm. Offers a clean finish, excellent insulation, and a fully openable design.

## CASEMENT WINDOW

Similar to casement door but for windows: opens outward/inward on side hinges; good ventilation, good sealing; multiple glass thickness options. (From "Sliding & Casement" category.)

## SLIDING DOOR

Panels slide horizontally on tracks; maximizes glass area; smooth operation; good for connecting indoor/outdoor spaces; minimal space usage when open. (Part of sliding & casement range.)

## SLIDING WINDOW

Smooth, space-saving design with sashes that glide horizontally on tracks. Offers wide glass area for maximum light and ventilation.

## ARCH WINDOW

Decorative arch shape; provides classic or architectural interest; good for allowing light and visual elegance.

## ARCH DOOR

Same arch aesthetic applied to door; curved top; combines functionality with decorative style.

## SLIDE & FOLD WINDOW

Panels that fold plus slide; can fold back to open wide; flexible opening options; large unobstructed opening.

## SLIDE & FOLD DOOR

Like slide & fold window but for door-sized units; good for patio, large openings; divides indoor-outdoor; heavy duty tracks & hardware.

## FRENCH WINDOW

Two panels hinged at center (or on sides) that open outward/inward; traditional look; often with glazing bars; allows wide opening for ventilation.

## FRENCH DOOR

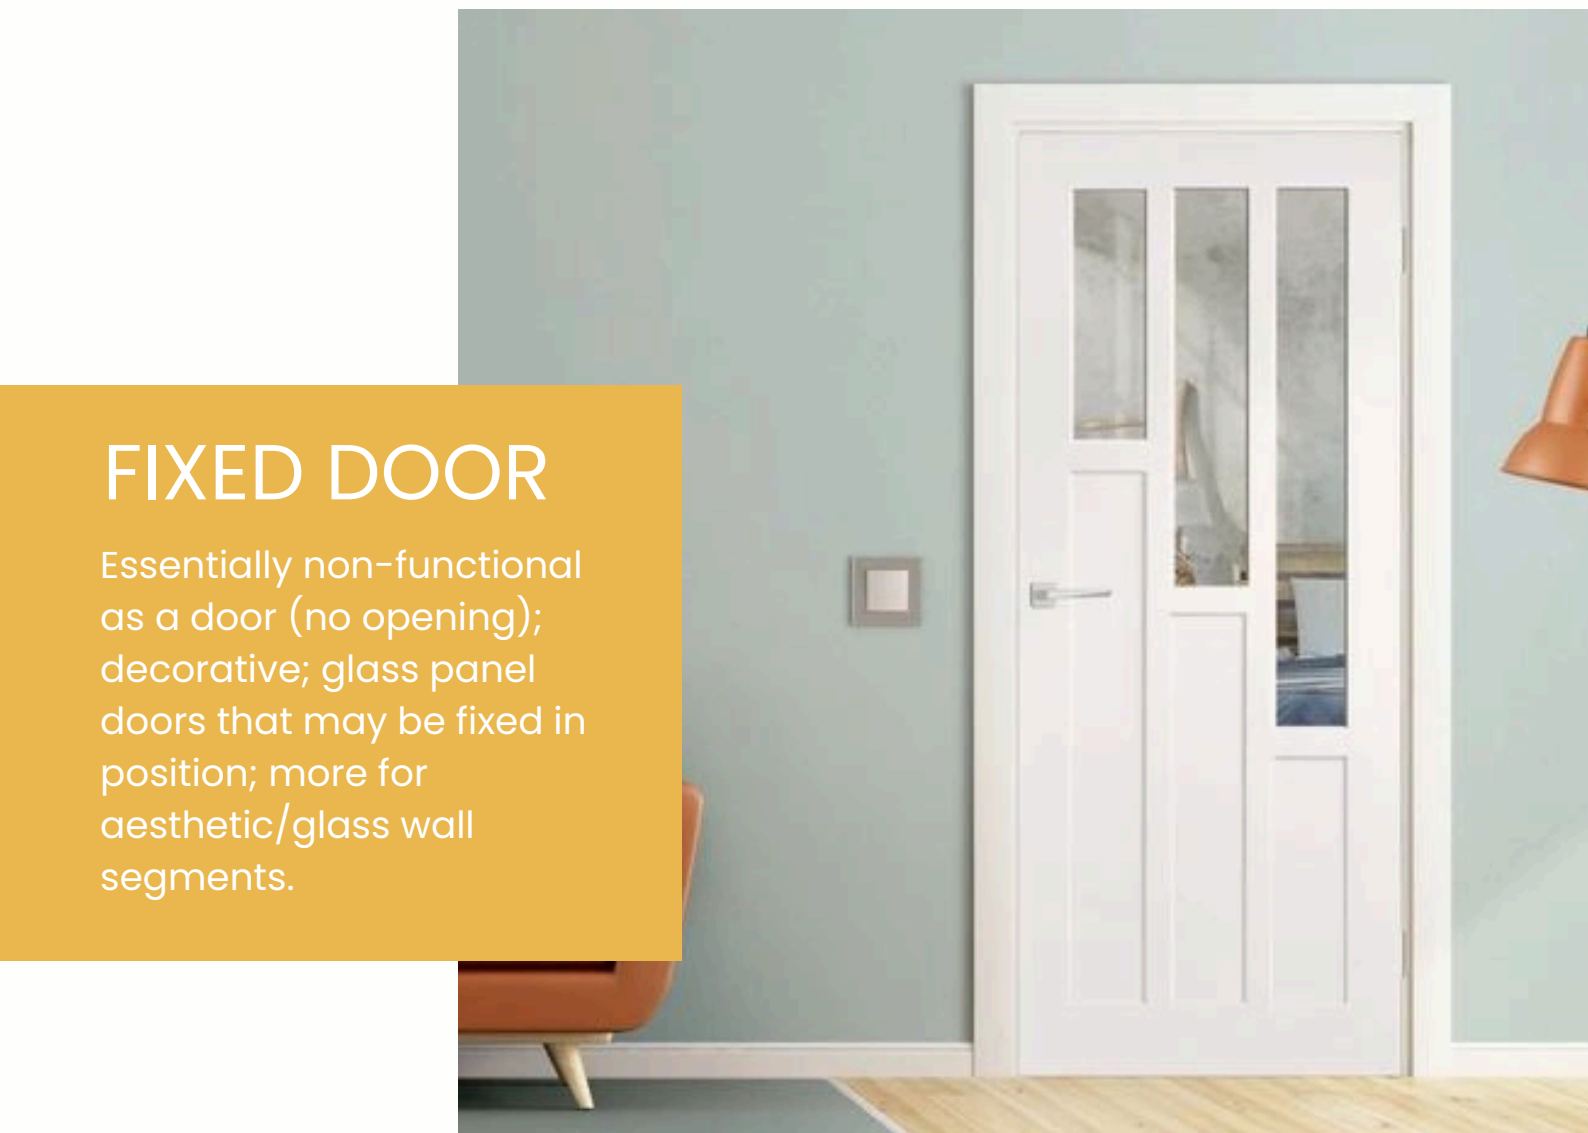

Similar to French window but door sized; aesthetic elegance; double doors; glazed; allows more light; can open fully.

## FIXED WINDOW

Stationary, non-opening window; used to allow light without ventilation; good for views; often uses large glass panels; minimal frame interruptions.

## FIXED DOOR

Essentially non-functional as a door (no opening); decorative; glass panel doors that may be fixed in position; more for aesthetic/glass wall segments.

## VENTILATOR

Small opening for air flow; perhaps top-hung or side hinged; allows continuous ventilation without fully opening; helps with airflow. From "Tilt & Turn & Ventilator" category.

## TILT & TURN WINDOW

Dual-function: tilt for ventilation (top); turn for full opening (like a casement); multi-point locking; good thermal and sound insulation.

## TOP-HUNG WINDOW

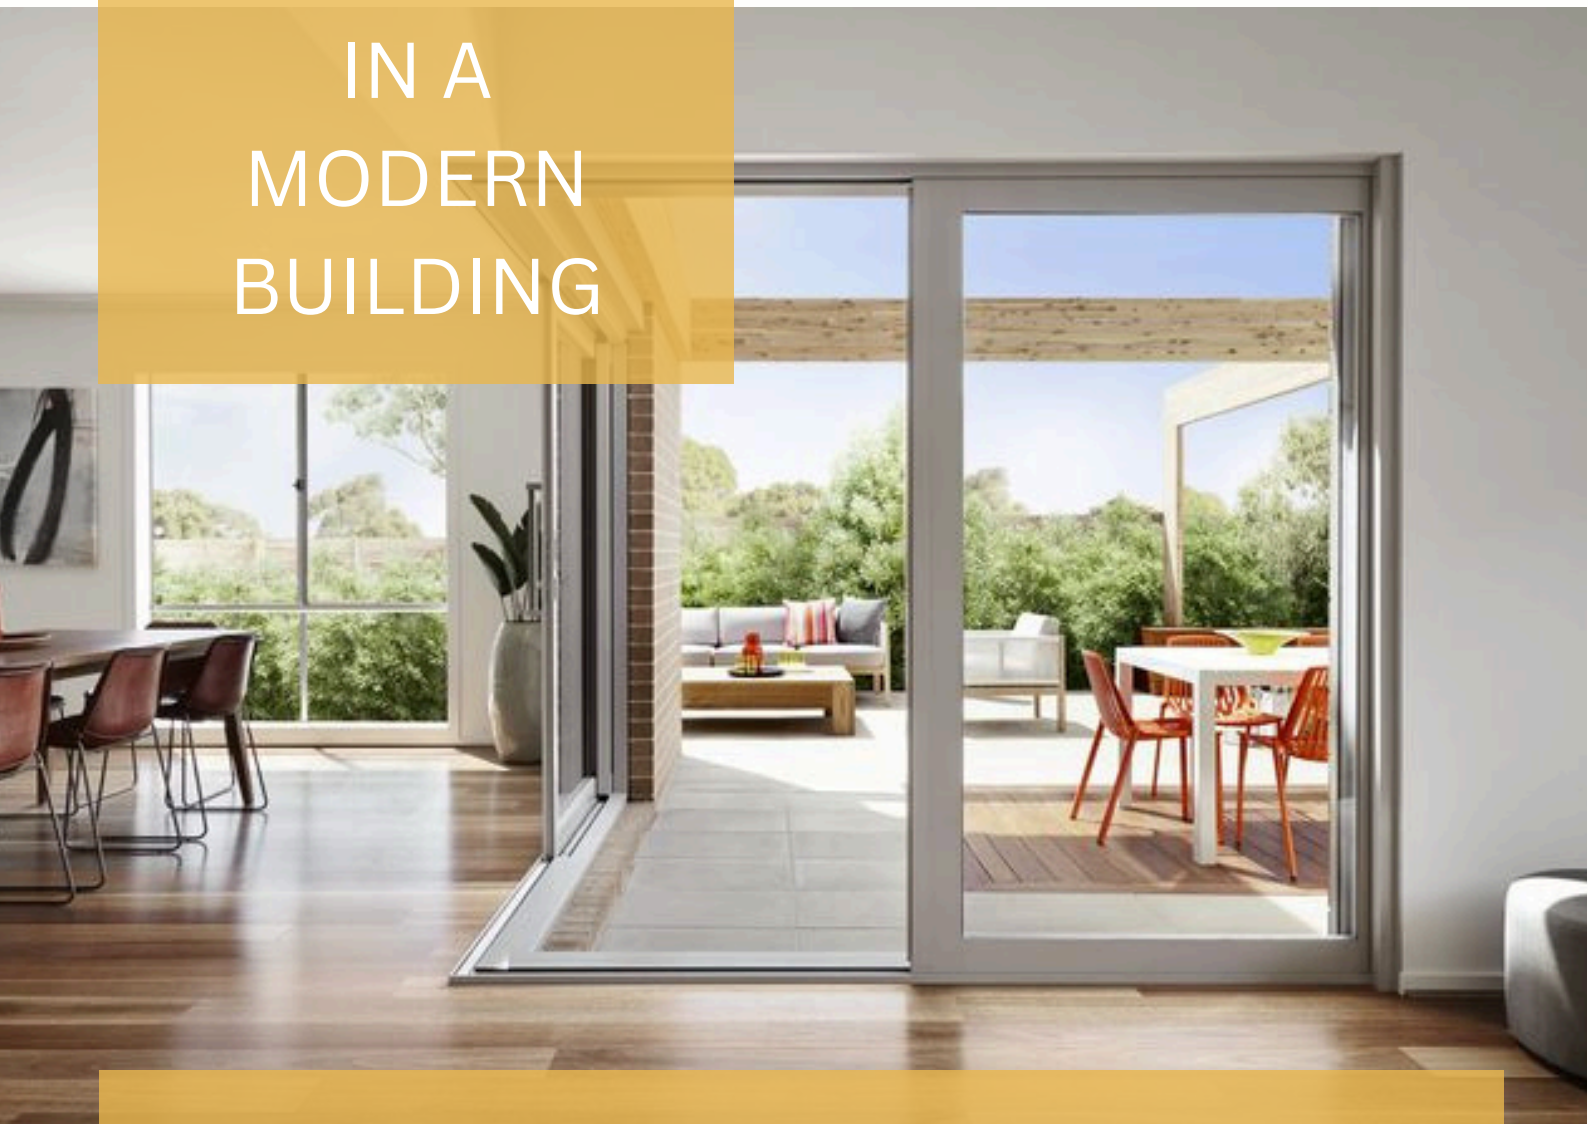

Hinged at top; the bottom swings outward; good for letting air in while keeping rain off; often used above eye level; good for ventilation.

## WELCOME TO GLAZURA INDIA PRIVATE LIMITED

Glazura is a leading manufacturer of modern aluminium doors & Window. We provide innovative, durable, and aesthetically pleasing solutions for homes, offices, and commercial spaces. Our aluminium collection is designed to combine strength, elegance, and energy efficiency.

# CASEMENT WINDOW

At Glazura, our casement windows are designed to combine style, strength, and functionality. These side-hinged windows open outward to provide maximum ventilation and unobstructed outside views. Their sleek design allows more natural light to brighten interiors while maintaining a modern and elegant appearance. Built with durability and secure locking systems, Glazura casement windows are perfect for both residential and commercial spaces, offering comfort, safety, and timeless aesthetics.

# CASEMENT FRENCH WINDOW

At Glazura, our casement French windows combine elegance with functionality, creating a timeless style for modern living. Designed with side-hinged panels that open outward, they offer wide and unobstructed openings for excellent ventilation and clear outside views. The classic French design allows maximum natural light to enter, making interiors brighter and more inviting. Built with durable materials, sleek finishes, and secure locking systems, Glazura casement French windows are an ideal choice for both residential and commercial spaces, adding a touch of sophistication along with strength and safety.

## THREE TRACK SLIDING WINDOW

At Glazura, our three track sliding windows are designed to offer wider openings, better ventilation, and seamless functionality. With three smooth-gliding tracks, multiple panels can slide effortlessly, allowing maximum flexibility in space usage. These windows bring in abundant natural light, give a clear outside view, and add a sleek, contemporary touch to any building. Built with durable materials and secure locking systems, Glazura three track sliding windows are perfect for homes, offices, and commercial projects that demand style, strength, and convenience.

## TWO TRACK SLIDING WINDOW

At Glazura, our two track sliding windows are crafted for smooth performance, space-saving convenience, and modern aesthetics. With two parallel tracks, the panels glide effortlessly, making them easy to operate while providing excellent ventilation and natural light. Their sleek design enhances the look of any interior or exterior space, while the durable construction and secure locking system ensure long-lasting performance and safety. Ideal for homes, offices, and commercial buildings, Glazura sliding windows combine functionality with style.

## TILT & TURN WINDOW

At Glazura, our tilt & turn windows are crafted to offer versatile functionality with a modern, elegant design. With a simple handle movement, the window can tilt inward from the top for controlled ventilation or swing fully inward like a casement for effortless cleaning and maximum airflow. This smart design enhances safety, ensures energy efficiency, reduces noise, and adds a sleek, contemporary touch to any home or office space.

## THREE TRACK SLIDING DOOR:

At Glazura, our three track sliding doors are designed for wide openings, smooth operation, and modern elegance. With three parallel tracks, multiple panels glide effortlessly, allowing flexible space usage, maximum natural light, and excellent ventilation. Built with durable materials and secure locking systems, Glazura three track sliding doors perfectly combine style, strength, and functionality for homes, offices, and commercial spaces.

## SLIDE & FOLD DOOR

At Glazura, our slide & fold doors combine elegance with functionality, allowing large openings without occupying extra space. The panels slide and fold effortlessly, offering seamless indoor-outdoor connectivity, maximum natural light, and excellent ventilation. Built with durable materials and secure locking systems, Glazura slide & fold doors are perfect for modern homes, offices, and commercial spaces, enhancing both style and practicality.

## PARALLEL WINDOW

At Glazura, our parallel windows are designed for modern aesthetics and smooth functionality. The sash moves parallel to the frame, providing excellent ventilation, unobstructed views, and easy operation. With durable construction, secure locking, and a sleek design, Glazura parallel windows are perfect for homes, offices, and commercial spaces, combining style, safety, and practicality.

## SMART WORKSPACES

Soundproof, sleek, and durable solutions that create a professional environment while ensuring comfort and efficiency in offices.

## HIGH-RISE & LARGE PROJECTS

Engineered for strength, safety, and long-term performance — ideal for apartments, towers, and large-scale developments.

## PREMIUM COMMERCIAL SPACES

Perfect for showrooms, retail outlets, and malls — designed to handle high footfall while maintaining stylish aesthetics.
